PROJECTS UNDERTAKEN

- **Project title – “Weekend Working Application” – Python Technology**
The purpose of this application is to help the Managers in creating a weekend working plan on upcoming Saturdays/Sundays. It makes provision to select different project followed by employees in the project. Manager needs to choose the building/room where the employee needs to come and also whether he requires cab facility or not. It also sends a reminder on Wednesday to all the managers to plan their coming and also sends them the available rooms for the coming weekend.
- **Project Title – “Entrada – Visitor Management System” – Python Technology**
The purpose of this application is to manage the visitors/appointments in the organization and also marking the attendance of the employees of the organization. It downloads the data from the Biometric database, performs the calculations and then marks the attendance into the Portal, from where the employees can view their attendance. Entrada enables the HR team to create an appointment for a visitor and enables the guard to create a new visitor and printing a visitor card for the same. Whenever a visitor arrives, his on-the-spot clicked photograph is printed on his Visitor Card.

- **Implemented two-pass Assembly Language Macro Processor – Java Technology**
This project consisted of creating equivalent machine code in two phases namely pass 1 and pass 2. In pass 1, four tables are created namely Symbol table, Literal table, Register Table and Machine Mnemonic Code Table. In pass 2, the missing values in Mnemonic Code Table are filled using the other three tables.

ACHIEVEMENTS AND EXTRA CURRICULAR ACTIVITIES

- Got **93** and **88** percentile in Aptitude section test conducted by E-litmus and AMCAT respectively.
